

Extended Field Ultrasound Probe & Cord Cover Kits

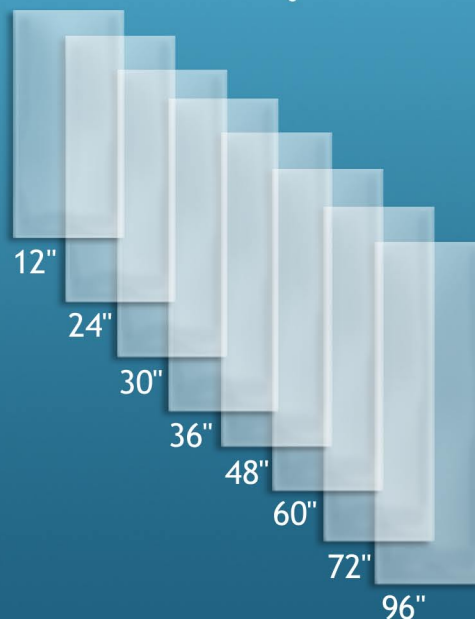

Many unique sizes to choose from for various sterile procedures including

- Amniocentesis
- Ultrasound Assisted Biopsies
- Vascular Surgery
- PICC Line Insertion

- **Optimum Imaging Properties** - Our custom polyurethane formulation more closely echoes the acoustic properties of tissue than any other known Non-Latex probe cover material - improving transmission and reducing reflections and artifacts.
- **Optimum Ease of Use** - Easy-Release Rolled products from 8" to 96" in length makes transducer and gel insertion more accessible and allows for quick & simple extension over the handle and cable.

Probe Covers come in a variety of widths and lengths. Widths from 1"D to 6"W and Lengths from 8"L to 96"L
